

FOR IMMEDIATE RELEASE

February 20, 2004

Subject: Irish Air Corps

LifePort, Inc. has recently delivered and installed an advanced life support (ALS) patient handling system in a Lear 45 to the Irish Air Corps. The LifePort system will be flown by the new leader of the EU throughout Europe.

Air Ambulance equipment will include a single patient configuration. The system includes converter, compressed air and suction system.

LifePort's loading system allows the patient to be loaded without any lifting or tilting during the loading process.

LifePort, Inc. has been providing custom solutions for aircraft medical interiors for over ten years. For more information, contact Frank Graham, Vice President, Sales by phone at (360) 225-1212 or email frank@lifeport.com.
