

## **LIFEPORT AWARDED CONTRACT BY MAJOR EUROPEAN COMPLETION CENTER**

LifePort has started delivering custom divans for a Boeing 737-700 project with a large European completion center. LifePort has a long history of designing, manufacturing, and delivering world-class products for the VIP and aeromedical industries - specializing in custom designs that meet demanding program specifications.

Highlights of the project include:

### Tracking, Single-Place VVIP Divan:

- Deployable armrests, detent released
- Track and swivel base
- Deployable, mechanical footrest
- Reclining backrest
- Adjustable lumbar support
- 10" tracking forward, aft, and laterally from center position to 5"
- 360° pivoting base, does not effect DPCU wiring
- Swivel mechanism is located above tracking mechanism for fluid motion
- Lightweight, machined aluminum frame

### Three-Place Bunking Divan:

- Converts into bunk bed, gas spring assisted
- 9g divan approved for flight loads while in the sleeping position
- Single lever release for bunking mechanism
- Berthing feature tested to Boeing abuse loads
- Lightweight, machined aluminum frame
- Lower bunk has ample sleeping room
