FOR IMMEDIATE RELEASE

FEBRUARY 26, 2004

KOALA A119 INTERIOR

LifePort, Inc. is delivering the first modular air ambulance interior for the Agusta A119 (Koala) single engine helicopter.

The medical interior will be delivered in April as a first article for a full FAA Certification program.

The medical interior includes a seamless floor, which has both Bio-cide and Fungicide properties. Interior will also include an IV warmer, a slide out shelf for vital signs monitor, a locking drug box and suction canister. Advanced life support will be accomplished with the addition of a MedPak, which will include oxygen, compressed air, vacuum, and a/c power. A modular MedWall will centrally locate switches and outlets for maximum patient care.

LifePort, Inc. has sold two additional positions for the Koala interior to be delivered during calendar year 2004.
