DEAGUE FIRE DEPARTMENT AND LG INTERNATIONAL AVIATION TEAM TAKES DELIVERY OF NEW LIFEPORT AEROMEDICAL INTERIOR

LIFEPORT, INC. Woodland, WA recently delivered a modular multi-mission, air medical interior to the Daegu Fire Department, Daegu, South Korea for use in their Eurocopter AS350 B2 helicopter.

This medical interior includes the LifePort MedDeck patient loading system with AeroSled RS stretcher, along a MedWall-Pilot/Patient barrier and cabin service outlet station. The advanced life support module or MedPak is located in the cargo area and includes an oxygen cylinder, suction, compressed air system and electrical components. This interior will also feature the LifeGard MedFloor an extremely durable and seamless medical floor with both biocide and fungicide properties.
